Title : 'The New Organization' : Myth or reality?

Speaker : Prof. D. Hugh Whittaker

Abstract :

Some US researchers have described the death of the 'old' bureaucratic organization, and the emergence of 'new' flat, flexible and diverse organizations. In this session we explore whether reality matches the hype, and whether the concepts apply in Japan as well. The objective is to understand better how the competitive environment, organization design, governance and employment relations are linked and interact.
